

Homework — Day 2

The one skill that separates AI users from AI operators.

Theme: Prompt Mastery • Time: 45 min

YOUR MISSIONS

01 Prompt Refactor

Take 3 prompts from your ChatGPT history. Rewrite each using R.A.C.E.F. Compare outputs.

02 Idea Shortlist

Pick your top 3 problems from yesterday. Run each through the 5-question filter. Kill the losers.

03 Reddit Recon

Find 3 Reddit threads where people are complaining about a problem in your space. Screenshot the juiciest quotes — those are your future customers.

REFLECTION — WRITE, DON'T THINK

☐ Which of your 3 ideas passed all 5 filter questions?

☐ What surprised you when you rewrote your prompts?

☐ Which Reddit quote made you go 'oh wow, someone would pay for this'?

DM someone on Reddit or Twitter who's complaining. Just ask: 'Hey, how bad is this problem on a 1-10?' The answer might change everything.
